

# Arturs Derkintis - iOS Developer

London, UK

[artursderkintis@gmail.com](mailto:artursderkintis@gmail.com)

+44 (0) 7754204206

## Profile

Self-taught iOS developer with over 6 years of experience. In last 2.5 years I've been working in various commercial environments. I also have 8 months of experience working remotely. I have excellent problem solving skills that I've acquired over years of trial and error. I make it my goal to write clean, testable and scalable code. I have extensive experience with maintaining legacy codebases and refactoring redundant and unscalable code.

My preference is MVVM architecture which I like to combine with Protocol-Oriented approaches. Mainly working with Swift language, but I've worked extensively with Objective-C prior Swift release in 2014.

## Work Experience

### *Senior iOS engineer - Urban Massage (12.2017-Present)*

Developing two iOS apps for customers and therapists. Working solely on both apps, implementing new design and functionality features.

### *iOS developer - Amico.ai (05.2017-11.2017)*

Working remotely for startup in Malta. Helped developing their iOS app.

### *Jr. iOS developer - Trinity Mirror (07.2016-03.2017)*

Developed their MVP app called Perspecs.

### *Indie iOS developer (08.2012-06.2016)*

Self-learned how to code and build apps.

Built various projects with different language and different architectural approaches.

## Skills

Programming Languages: Swift, Objective-C

Frameworks/Tools: Realm, ReactiveSwift, ReactiveCocoa, RxSwift, CocoaPods, Git/SourceTree/Github, Fastlane, Bitrise

Design Tools: Photoshop, Sketch, Blender

Other stuff: Unity3D, SpriteKit, ARKit

## Projects

Commercial projects:

- [Urban.app](#) customers faced app to get a massage/osteopath to your home at the time you choose.
- [Urban Massage Hero.app](#) for therapists/osteos to see their bookings and manage their diary.
- Amico.ai iOS app not available on App Store anymore, but it was similar to Facebook to some extent.
- [Perspecs.app](#) news app with three perspectives of each topic.

Personal projects:

- Starfly.app - a better looking and faster web browser for iPads.

There's still some of my old (embarrassing) experiments on my GitHub profile.
